

## CALL FOR WORKSHOP PROPOSALS

ACM/SPEC ICPE invites workshop proposals on specific topics related to performance engineering of software and systems. The workshops will be held on April 20th -21st.

A workshop proposal should be no more than 2 pages in length, submitted in PDF format.

### The following details are required:

- Workshop title
- Organizing committee. Having more than one organizer is strongly advised. Name, contact details and a short bio which should include previous experience in the organization of similar events.
- Estimated number of attendees
- Details about previous editions, if any, including links to the corresponding websites, proceedings, or any other important information
- A description, specifying the focus of the workshop and its goals.
- A brief justification of the relation with the main conference topics and the target audience of the workshop.
- The list of the committed and proposed members of the technical program committee.

### Workshop organizers will be responsible of the following tasks:

- A web page with the details of the workshop which will be linked from the main conference web page.
- The submission process of the workshop papers. The workshop papers are a maximum of 6 pages in ACM format.
- The review of the papers. All the workshop papers must be reviewed at least by 2 members of an international and broad technical program committee of the workshop.
- The notification of the authors
- Checking the camera ready papers, template guidelines and paper length. All the papers must follow the same template than the main conference papers (please check the conference site).

At least one author for each paper must register and attend the workshop.

If the final number of papers in a workshop is very small, the workshop chair may propose to merge it with another workshop. In extreme cases, we may negotiate the cancellation of the workshop. Therefore, we encourage workshop organizers a broad and active advertising of the workshop. Additionally, ICPE program committee can suggest the inclusion of borderline papers of the main conference in any of the workshops.

## IMPORTANT DATES
